

You're a trustee for lots of very good reasons

In these difficult times, your organisation needs the board you sit on to govern effectively

But, do you have all the knowledge, skills and support you need to perform well and give your organisation the strategic direction it needs?

Thrive Trustee Network

supporting trustees to support each other

a Third Sector Hub initiative

As a trustee of an organisation in the voluntary, community or wider third sector, you have a position of great impact. The strategic decisions that you and your co-trustees make can be of critical importance to the survival and growth of your organisation.

In these difficult times it is more important than ever for organisations to ensure that their board of trustees is fit and efficient and contributing effectively to the strategic directions of the organisation.

Taking a long, hard look at the performance of any board of trustees, or at your own performance as a trustee is a brave step. But only by doing so can you and your organisation improve performance and bring strength, stability and the potential to thrive to the organisation.

That most trustees serve on a voluntary basis only makes it more difficult to invest the time and money necessary to review performance and build the skills, expertise and confidence needed.

The Thrive Trustee Network is a simple and cost effective way of supporting both trustees and their third sector organisations based in North East Lincolnshire.

Join as an individual Trustee (£25) or as an organisation (£125 gives membership for *all* your trustees).

Access to information, resources and a dedicated website.

“Trustees Together” – free bi-monthly members meetings where like-minded Trustees can give and receive support with each other.

50% off training courses delivered through the Hub.

Members collectively work together to support each other.

Keep the support going through online member only discussion groups.
